We are ULMA

Projects,
Ideas,
People.

ULMA
Agrícola

01

.. Greenhouses

ULMA Agrícola produces and markets all manner of greenhouse structures and covers for livestock or warehouses. It operates in a global market, offering comprehensive solutions aimed mainly at the Agriculture and Livestock sectors.

Its structures incorporate the most advanced climate control technology, engineering, and specialist assembly and after sales services. ULMA Agrícola creates custom projects based on individual customer's specific needs.

ULMA
Architectural
Solutions

02

.. Solutions for Architecture and Engineering

ULMA Architectural Solutions designs, produces and markets innovative industrial prefabricated systems and products for architecture and engineering.

ULMA Architectural Solutions is focussed on finding new construction solutions. It develops a wide range of architectural solutions in polymer concrete such as products for Drainage Systems, Facade Systems, External Wall Systems and Architectural Precast (Window sills, lintels, etc.).

ULMA
Forklift
Trucks

03

.. Forklift Trucks

ULMA Forklift Trucks specialises in comprehensive merchandise handling solutions employing maintenance machinery.

More than 30 years' successful experience have enabled it to focus the organisation on the most demanding customer requirements, providing high levels of quality and professional advice when analysing their needs and productivity increases.

ULMA
Construction

04

.. Construction formwork and scaffolding

ULMA Construction offers complete solutions for formwork, climbing systems, shoring and scaffolding, both for rent and for sale for civil works, and residential and non-residential buildings for industry and renovation.

During its more than 50 years of existence, it has accumulated knowledge and experience in each market, as well as its construction techniques. This know-how allows it to offer its customers products, solutions and services that are innovative, highly productive, safe, and efficient.

ULMA
Conveyor
Components

05

.. Rollers, Garlands, Idlers and Pulleys

ULMA Conveyor Components designs, manufactures and markets rollers, garlands, idlers and pulleys for the transport of bulk material, mainly used in the mining, energy, cement, port terminal and steelworks sectors.

ULMA
Packaging

07

.. Packaging Equipment and Systems

ULMA Packaging designs and produces packaging equipment and services, for which it possesses the most advanced design and production technologies.

With the broadest range of machinery and applications on the market, its team of highly qualified professionals work to always offer the best solutions for its customer's needs. ULMA Packaging is committed to innovation, quality and service, and its vocation is to add value to its customer's products.
